- 28" - 48" wide, 4 lb.	**ERSK4**
- 36 ½" - 72" wide, 6 lb.	**ERSK6**

Laminated Roller Shade: Step-By-Step Instructions

Benefits:

- Use R-TEC Automated Shade Tubes or EZ Rise Spring system for cords free shades.
- Add visual interest to home interiors by using one of a wide range of home décor fabrics.

Supplies:

- Decorative Fabric – should have 14" - 16" additional fabric for shade length and at least 3" all the way around
- A clean, firm work surface, large enough to accommodate your shade. A rotary cutting mat is a preferred surface.
- Shade Laminating Adhesive - **FA40** or **FA45**
- Room Darkening Window Shade Cloth – **JV48/** (available in 36", 45", 54", 72" & 3, 10, 30 yard lengths)

- Carpenter's Square
- Straight Edges
- Rotary Knife
- Sharp Scissors
- Fray-A-Way Spray – **AS41**
- Two short nap paint rollers
- 1" masking or blue painter's tape
- Headrail system for the shade

NOTE: It is a good idea to practice making a small shade sample prior to using the fabric for your customer's shade.

Prepare the Fabric:

1 The fabric should be free from creases. Iron if necessary.

2 Cut the fabric as described previously.

3 Roll the fabric on a fabric tube, wrong side out.

Laminating:

1 Place the shade cloth on the worktable.

2 Tape the shade cloth to the table to prevent shifting as you work.

3 Pour the shade laminating adhesive to the shade cloth.

4 Apply the adhesive to the shade cloth using a clean paint roller, rolling in all directions until the adhesive becomes tacky.

5 Apply the shade fabric to the shade cloth.

6 Carefully unroll the fabric on the shade cloth, smoothing from the center to the edges by hand.

7 Use the second (clean) paint roller to roll over the shade cloth, removing any air bubbles.

8 Allow the adhesive to completely dry.

9 Mark the shade cloth for width and length.

10 Carefully cut the shade cloth.

Complete the Shade:

1 Spray the edges of the shade with Fray-A-Way spray – always test first on a fabric remnant.

2 Create a bottom hem in the shade.

3 Fold up the bottom and hold in place with Jumbo Wonder Clips.

4 Attach the roller shade to the shade tube.
