

Pillow Holder Instruction

(PF4)

The **Pillow Holder** is an innovative product from Rowley Co. This device can help you to hand sew pillow forms by yourself. The unique design of the device makes it extremely easy to use and will save you time and money.

Part Lists (see Figure 1)

1. 2 pillow holder brackets
2. 2 bead chain hooks
3. 4 #8 hex screws 3/4"
4. 2 extra glass head pins (They are spare parts for you to make replacement hooks if any of them get broken.)

Figure 1. Parts

Set Up the Device (see Figure 2)

Cut a piece of 1"X4" or 1"X6" lumber to 36" long. Attach the 2 pillow holder brackets to the board 30 inches apart if the un-sewn side of your pillow forms falls between 8" and 24". Reduce the bracket distance if the un-sewn side of your pillow form is less than 8", and increase the bracket distance if the un-sewn side of your pillow forms is longer than 24". The device is ready now. You can clamp the device on a table with Rowley's Quick Set/Release Clamps, QC10.

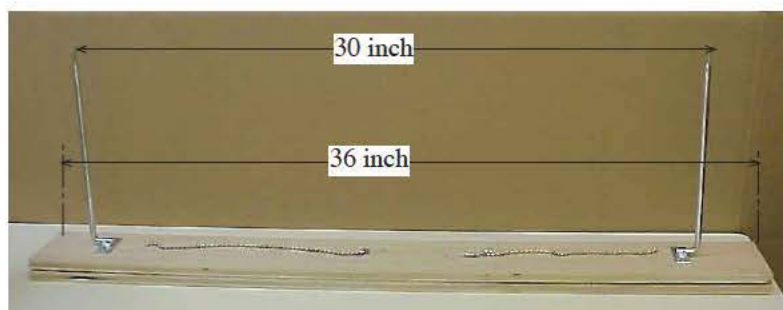

Figure 2. Set Up the Device

Hook Pillow Forms on the Device (see Figures 3 and 4)

1. Hook one corner of the pillow form with one of the bead chain hooks, and then attach the bead chain to one of the pillow holder brackets.
2. Hook the other corner of the pillow form with the other bead chain hook, then stretch the pillow form straight and attach the bead chain to the other pillow holder bracket.
3. Now you can hand sew the pillow form straight.
4. After sewing, take one of the bead chains off the pillow holder bracket, and then unhook the pillow form.
